

NAGAMRUTHA MEESALA

Data Analyst | Business Intelligence Analyst | SQL & Power BI

Vijayawada, Andhra Pradesh | nagamrutha9917@gmail.com

[LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Detail-oriented Data Analyst and Integrated M.Tech Software Engineering student (CGPA: 8.37) with hands-on experience in Python, Pandas, NumPy, Matplotlib, SQL, PostgreSQL, Power BI, DAX, Power Query, and Microsoft Excel. Skilled in data analytics, dashboard development, data visualization, and business intelligence, with a track record of turning raw data into actionable business insights through structured analysis and problem solving. Seeking a Data Analyst or Business Intelligence internship to apply strong analytical and technical skills in a data-driven environment.

TECHNICAL SKILLS

Programming: Python, SQL

Python Libraries: Pandas, NumPy, Matplotlib

Databases: PostgreSQL

BI & Visualization: Power BI, DAX, Power Query, Data Visualization, Dashboard Development

Analytics: Data Analytics, Exploratory Data Analysis (EDA), KPI Reporting, Data Modeling, Business Intelligence

Productivity Tools: Microsoft Excel (Pivot Tables, Charts, Formulas), Microsoft Office

EXPERIENCE

Data Analyst Intern (Self-Paced Virtual Internship)

SkillCraft Technology

- Completed a self-paced virtual internship applying Python, Pandas, and NumPy to clean, preprocess, and structure raw datasets for analysis.
- Performed exploratory data analysis (EDA) to identify trends, patterns, and outliers, using Matplotlib to visualize key findings.
- Queried and analyzed structured data using SQL and PostgreSQL to extract business insights from relational datasets.
- Built interactive dashboards and reports in Power BI and Microsoft Excel to summarize KPIs and support data-driven decision-making.
- Applied DAX and Power Query to transform and model data within Power BI for accurate, reusable reporting.
- Practiced end-to-end data analytics workflows, from data cleaning and transformation to visualization and reporting, on real-world style datasets.

PROJECTS

Global Superstore Analytics Dashboard | Power BI | DAX | Power Query

- Designed and developed an interactive Power BI dashboard analyzing 10,000+ sales records to evaluate profitability, customer behavior, and regional performance trends.
- Built dynamic KPI cards, YTD metrics, and geographic maps using DAX and Power Query, improving stakeholder visibility into sales performance.
- Delivered data-driven insights on top-performing regions and product categories, supporting inventory and pricing strategy decisions.

Customer Churn Analysis Dashboard | Power BI | DAX | SQL

- Developed a multi-page Power BI dashboard using SQL and DAX to analyze customer churn, retention trends, and segmentation.
- Performed exploratory data analysis to identify key churn drivers, uncovering patterns linked to tenure, contract type, and service usage.
- Delivered actionable retention recommendations to stakeholders, supporting data-informed customer retention strategy.

HR Analytics Dashboard | SQL | Excel | Power BI

- Queried and cleaned employee datasets using SQL and Excel to analyze attrition, salary distribution, and workforce demographics.
- Designed Power BI dashboards to visualize employee performance and attrition trends across departments.
- Enabled HR stakeholders to identify at-risk departments and inform workforce retention strategy through KPI reporting.

Bank Loan Analysis | SQL | PostgreSQL

- Analyzed loan portfolios and repayment behavior using advanced SQL techniques, including joins, subqueries, CTEs, and views in PostgreSQL.
- Identified customer borrowing patterns and loan performance trends across multiple risk segments.
- Delivered insights supporting credit risk assessment and portfolio management decision-making.

Excel Sales Dashboard | Microsoft Excel | Power Query

- Designed and implemented an interactive Excel sales dashboard using Power Query, dynamic charts, KPI cards, and slicers.
- Automated data transformation workflows, reducing manual reporting effort and improving data accuracy.
- Enabled managers to monitor sales performance and identify trends at a glance, improving decision-making speed.

E-commerce Sales Analysis | SQL | PostgreSQL | Excel

- Queried e-commerce transaction data using SQL and PostgreSQL to identify bestselling categories and seasonal demand spikes.
- Performed exploratory data analysis on customer purchase behavior to generate actionable retail strategy insights.
- Presented findings to support inventory planning and targeted marketing campaign decisions.

EDUCATION

VIT-AP University — Integrated M.Tech in Software Engineering

Expected Graduation: 2029 | CGPA: 8.37 / 10

Sri Chaitanya Junior College — MPC (Mathematics, Physics, Chemistry)

2022 – 2024 | Score: 95.1%
